Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-16 drawn to an image processing apparatus/method using a plurality of different image reproduction parameters, setting means, and converting means, classified in class 348, subclass 223.1.
- II. Claims 17-22 drawn to an image processing apparatus/method having first input means, second input means indicating an arbitrary position of image data, extracting means setting means are corresponding to the position information, and processing means. Classified in class 348, subclass 231.6.
- III. Claims 23-24 drawn to an image processing apparatus/method for adjusting the hue of an input signal comprising means for inputting color information with respect to a specific image region and means for determine the hue of a whole image. Classified in class 348, subclass 587.

2. The inventions are distinct, each from the other because of the following reasons:

In the instant case, invention as claimed in **Group I** only teaches to use a plurality of different image reproduction parameters for reproduction which does not include extracting an arbitrary position of image data as claimed in **Group II**, and which does not include adjusting the hue with means respect to a specific image region and means for determine the

Art Unit: 2612

hue of a whole image. This same reasoning could be performed for all of the groups. See MPEP § 806.05(d).

3. In the event Group I is elected, Group I is subject to the following additional restriction requirement:

Group I contains claims directed to the following patentably distinct sub-species of the claimed invention: **figure 13; figure 14; figure 15.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently claim 10 and 16 is generic to all sub-species.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Lin Ye** whose telephone number is **(703) 305-3250**. If attempts to
